MAIL DATE	DELIVERY MODE
07/18/2007	PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No.	Applicant(s)	
	09/909,643	KANTER, ANDREW S.	
	Examiner	Art Unit	
	Jeffrey D. Carlson	3622	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1)☒ Responsive to communication(s) filed on *13 April 2007*.

2a)☒ This action is **FINAL**. 2b)☐ This action is non-final.

3)☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

4)☒ Claim(s) *1-8 and 10-20* is/are pending in the application.

4a) Of the above claim(s) _____ is/are withdrawn from consideration.

5)☐ Claim(s) _____ is/are allowed.

6)☒ Claim(s) *1-8 and 10-20* is/are rejected.

7)☐ Claim(s) _____ is/are objected to.

8)☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

9)☐ The specification is objected to by the Examiner.

10)☐ The drawing(s) filed on _____ is/are: a)☐ accepted or b)☐ objected to by the Examiner.

Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

11)☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

12)☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

a)☐ All b)☐ Some * c)☐ None of:

1.☐ Certified copies of the priority documents have been received.

2.☐ Certified copies of the priority documents have been received in Application No. _____.

3.☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

1) ☐ Notice of References Cited (PTO-892)
2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
3) ☐ Information Disclosure Statement(s) (PTO/SB/08) Paper No(s)/Mail Date _____.
4) ☐ Interview Summary (PTO-413) Paper No(s)/Mail Date. _____.
5) ☐ Notice of Informal Patent Application
6) ☐ Other: _____.

DETAILED ACTION

This action is responsive to the paper(s) filed 4/13/07.

Response to Amendment

The amendment filed 4/13/07 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows:

- The claims now require delivery of free hardware or software. While the specification provides support for free hardware or free software as a form of earned compensation, there is no disclosure regarding the delivery of the software or hardware. The closest support found are the following passages:
  - *"Typical compensation mechanisms which are suitable for this purpose include cash payments, free services, software or hardware, redeemable coupons or credits for access time or services deliverable directly to the user's computer, and the like" [0020].*
  - *"Compensation can be achieved using a variety of forms, including redeemable coupons, credits for access time or service deliverable directly to the user's computer, free hardware or software, and the like" [0034].*
- The first passage mentions "software or hardware", neither of which are necessarily described as "free"; the services are clearly "free". The "software

or hardware" are neither certain to be "deliverable" as it is the services that are deliverable. It is further clear that the only delivery described is directly to the user's computer which cannot be true of hardware. While the invention mentions "software or hardware" as compensation, the invention does not include their delivery or any delivery mechanism.

- The second passage mentions "free hardware or software" but clearly indicates that such does not include the ability for its delivery; such deliverable capability is reserved for "service"..

Claim Rejections - 35 USC § 112

Claims 1-7, 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- Claim 1 states that the compensation means is apparently delivery of free hardware or software, indicating that there is some structure capable of delivering software or hardware. It is not clear what structure is responsible for providing this delivery. Is applicant claiming a mailing/postal carrier or delivery apparatus?

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

> (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

2. Claims 1, 3-8, 10-15, 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Landsman et al (US6687737) in view of Goldhaber et al (US5855008).

Regarding claim 1, 8, 12, 15, Landsman et al teaches interstitial ads displayed to a user's browser from an Internet server. The ads are described as being displayed in browser popup windows which are shown to the user for a specified period of time (i.e. the duration of the ads) and the popup window is then removed upon completion. Landsman et al teaches that the AdDescriptor may specify that the user is NOT permitted to prematurely terminate (close) the ad displayed [32:5-46, fig 20]. The AdDescriptor file also specifies the duration of the ads [32:15-20, 37-40]. This is taken to provide a non-dismissible ad window that is temporarily shown for a pre-determined amount of time. Landsman et al also teaches that a log is kept regarding each ad impression [31:53-58]. Landsman et al also teaches targeting ads based on stored user profiles [21:13-20] – this is taken to provide the registered user database and ad viewing history. When a user requests a subsequent webpage (via the user's ISP server(s)), the advertising display is triggered. Landsman et al does not teach compensation. Goldhaber et al teaches many embodiments whereby a registered computer user is compensated for viewing advertising [abstract]. The advertising can be targeted based on the registered user's demographics. The compensation can be routed to the user's registered account. It would have been obvious to one of ordinary

skill at the time of the invention to have registered and compensated the ad-viewing users of Landsman et al's system so that users may be motivated to and may benefit from viewing online ads. Goldhaber et al teaches that the compensation may be cash or credit transferred to the user's computer or into her account [col 7 lines 51-54]. Goldhaber et al also teaches that the digital cash can have generic usefulness or can be restricted in its use to a coupon for particular product(s) [col 11 lines 25-31, col 10 lines 58-63]. It would have been obvious to one of ordinary skill at the time of the invention to have awarded the ad-viewing users with coupons for any type of product including free hardware in a manner as is generally well known. Further, applicant discloses a wide variety of typical compensation with no particular criticality associated with any of them, software or hardware included. Further, Goldhaber et al teaches that the rewarded compensation can be in turn used/redeemed for transactions [col 10 line 67 to col 11 line 7, col 12 lines 2-14, col 19 lines 63+]. It would have been obvious to one of ordinary skill at the time of the invention to have used the cash/credits earned through Goldhaber et al's system and simply purchased hardware – this results in what is taken to be a compensation of free hardware as well as "delivering" free hardware through the delivery of cash or coupons suitable for acquiring hardware. Further still, the cybergold coins earned by ad-viewing users of Goldhaber are taken to represent "software" that is delivered to the user.

Regarding claims 3, 6, 7, 11, 20, Landsman et al teaches that the AdDescriptor file can specify the size and location of the ad window [fig 20]. It would have been obvious to one of ordinary skill at the time of the invention to have displayed the window

anywhere including the top of the user's screen as a design choice so that the ad is quite visible. Landsman et al teaches that ads are known to include hotlinks to the advertiser and advertiser web pages [3:40-46]. It would have been obvious to one of ordinary skill at the time of the invention to have provided URLs for the ad objects so that a user may click on ads they are interested in. Official Notice is taken that it is well known for an advertiser to collect email/postal mailing addresses (demographic info) of interested prospective customer so that they can deliver more information about their products, services, sales promotions, etc. It would have been obvious to one of ordinary skill at the time of the invention to have provided fillable forms/windows on the advertiser's site in order to collect such information when user's request more information be sent to them. Further, it would have been obvious to one of ordinary skill at the time of the invention to have provided registration buttons and fillable forms/windows on the web site in order to collect registration information pursuant to Goldhaber et al's compensation. Goldhaber et al further discusses collection of personal data at registration time.

Regarding claims 4, 10, Landsman et al's plurality of ads to be shown and the ad queue are taken to provide a "series of ads" shown in an ad window.

Regarding claims 5, 14, the ad display is programmed to be delayed until the user transitions to a subsequent page. Further, Landsman et al teaches ads that sleep for a predetermined time period before they are shown again [32:25-33].

Regarding claim 13, when a user leaves a previous web site and triggers the ads, this action is taken as closing a computer program, the program being the HTML-programmed web site content.

3. Claims 2, 16-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Landsman et al (US6687737) in view of Goldhaber et al (US5855008) and Radziewicz et al (US5854897).

Regarding claims 2, 16, 17, Radziewicz et al also teaches interstitial ads. Radziewicz et al teaches that the user's connection speed to the Internet can be measured and the speed results can be used to select a particular format for the ads [11:7-28]. It would have been obvious to one of ordinary skill at the time of the invention to have specified various ad formats in the AdDescriptor file so that the user can receive rich multimedia ads if their PC/connection could handle such files.

Regarding claims 18, 19, Official Notice is taken that using a wireless connection in order to access the Internet is well known. It would have been obvious to one of ordinary skill at the time of the invention for wireless users to have participated in the combined system so that they can enjoy the Internet wirelessly.

Response to Arguments

Applicant argues that the art lacks teachings of free hardware or software delivery. This is addressed in the rejection above.

Applicant again argues that Goldhaber et al's teaching that users *may* view ads does not provide for claim 8's "registered user" who is somehow "assured" of compensation. Perhaps this is an argument stemming from the *previous* amendment which called for users to surrender the option to decline ads upon registration. This is no longer required by the present claim language. Further, examiner is not using Goldhaber et al as a base reference, but rather Landsman et al which may be programmed to eliminate user control of the ads. Goldhaber et al is provided as a secondary teaching for compensation earned for viewing ads. Further, the users of Goldhaber et al are clearly registered users.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey D. Carlson whose telephone number is 571-272-6716. The examiner can normally be reached on Mon-Fri 8a-5:30p, (work from home on Thursdays).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eric Stamber can be reached on (571)272-6724. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
